EXPERIENCE

Lyft

2018 – 2022

Senior Software Engineer, iOS

New York, NY

- Developed the initial bike and scooter integration in the Lyft iOS app, which scaled to 22 major markets.
- Lead the iOS integration with Motivate, which included mentoring the iOS engineers from the acquisition.
- Built and/or lead the development of several highly-visible features, such as the multimodal golden path.
- Key contributor and owner for critical infrastructure, such as the panel framework and automation testing.
- Actively involved with D&I initiatives, such as mentoring others and performing interviews at a diversity in computing conference.

Squarespace

2017 – 2018

iOS Engineer

New York, NY

- Helped rewrite Analytics iOS app leading to 1,000+ new user ratings and overall 5 star rating.
- Commerce app team tech lead, responsible for feature development and parity between platforms to enable further sales and growth of Squarespace's commerce efforts.

Genius

2016 – 2017

iOS Engineer

New York, NY

- Co-lead development of the Genius Lyric Messages keyboard enabling users to share song lyrics in iMessage.
- Featured in Apple's "iMessage apps we love" (on 1st day) section and on TNW, CNET, Engadget.

Tumblr

2015 – 2016

iOS Engineer

New York, NY

- Lead development of Tumblr's iOS instant messaging. Covered in Wired, TechCrunch, The Verge, Mashable.
- Tumblr iOS users sent over 9 million messages within 48 hours of launch.
- Built Tumblr TV for Apple TV, featured in the App Store.

AWARDS

Apple Design Award

2014

PanoPerfect

WWDC

- Built a social app for panoramic photos (over 60,000 posted) which has received 300,000+ downloads.
- Featured in Cult Of Mac, MacTrast, and numerous Apple promotions.
